

EXTRA CUSTOMER INSTRUCTIONS

To be used in conjunction with existing factory supplied instructions

Please find included with the hardware pack, rolls of self-adhesive foam strip.

Please note this is supplied to go on some joins that currently do not have a sealing rubber to help minimise dust escaping out of the unit.

Suggestions would be

The Lower Funnel, Funnel Mouth (Lower hatch) and funnel joins to cabinet.

Leftover foam strip can be fitted on other joins as needed.

Another option to complete a good seal is to use an appropriate silastic sealant upon assembling the cabinet.

It is also recommended to use a dust collector system to minimise dust and ensure that the dust collector filter bag is clean regularly.
