

SPARE PARTS SECTION

The following section covers the spare parts diagrams and lists that were current at the time this manual was originally printed. Due to continuous improvements of the machine, changes may be made at any time without notification.

HOW TO ORDER SPARE PARTS

1. Have your machines **model number, serial number & date of manufacture** on hand, these can be found on the specification plate mounted on the machine
2. A scanned copy of your parts list/diagram with required spare part/s identified
3. Go to www.machineryhouse.com.au/contactus and fill out the enquiry form attaching a copy of scanned parts list.

20	RING	2	42	SPRING	1
21	HANDWHEEL	2	43	ROLL PIN 6*40	2

This exploded view diagram illustrates the assembly of a mechanical component, likely a motor or actuator. The central part is a cylindrical housing (201) with a flange (203) and a mounting bracket (202). A long shaft (207) is shown in two positions: one passing through the housing and another passing through a separate bracket (217) and a long rod (218). The shaft (207) is secured with a nut (208) and a washer (209). A large gear or pulley (206) is mounted on the shaft, with a smaller gear or pulley (210) and a spring (214) also shown. A small pin (204) is used to secure the bracket (202) to the housing. A long rod (218) is connected to the bracket (217) and the housing (201) via a pin (216). A small pin (215) is also shown. The diagram includes a large, faint watermark reading 'HOUSE' across the bottom right.
